certifications taken and passed: please submit copies of certifications with application

\_\_\_\_\_ A+ hardware  
\_\_\_\_\_ MS Desktop/Operating  
\_\_\_\_\_ CCENT  
other (please list)

---

\* Background check: When preparing for a career in the area of information security, a quality background check is essential for the protection of both the student and the training institution. Security professionals are held to a higher standard than many information technology professionals which is why many employers will require a background check before hiring any new security personnel. A background check will ensure that the Cybersecurity program conforms to industry standards with respect to the training of security specialists.

Results of the background checks are confidentially retained by student service. If derogatory information is found as a result of the background check, further review of the student in question may be required before successful placement in the Cybersecurity program. Derogatory information, which may preclude a student from entering the Cybersecurity program, includes a misdemeanor, DUI, and felony convictions. Background checks that have convictions or pending charges will be reviewed by the program faculty for acceptance.

Information on getting background check completed will be provided to potential students upon application.
